Task Family

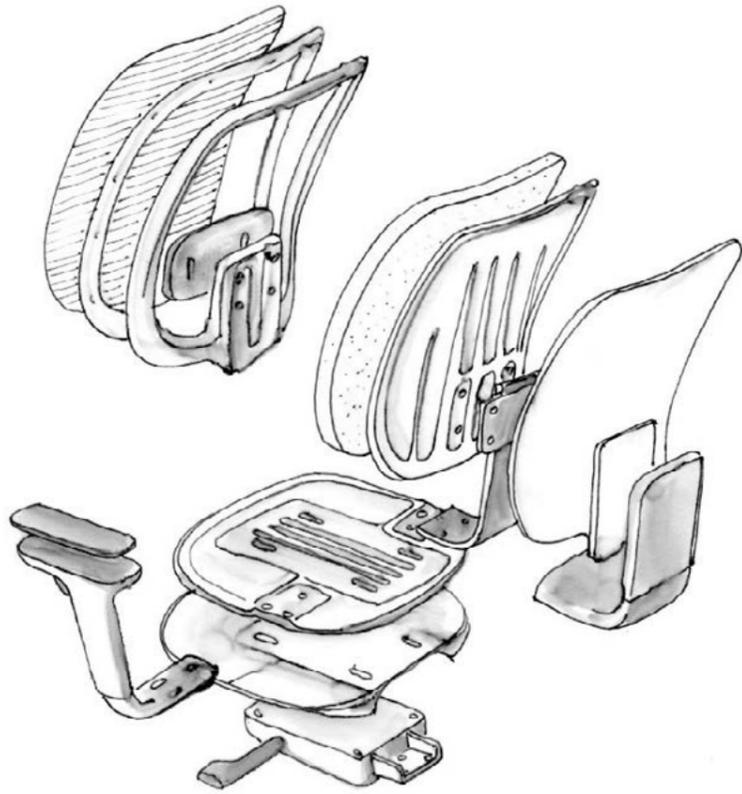

# Apollo<sup>\*</sup>

Designed for Real People

## CREATIVITY TAKES COURAGE... AND REGULAR COFFEE BREAKS.

The Apollo range of task chairs, designed by Irtzoki & Lizaso, features a pleasing, softly rounded shape that evokes simplicity, comfort, friendliness and well-being. Apollo addresses the need for work spaces that echo the comfort and well-being of home and promote a creative, collaborative spirit, places where constructive, transformational interaction, dialogue and exchange can take place. The range offers a choice of upholstered or mesh back and two types of armrest. And the price is gentle on the eye too!

# Apollo Design Story

## Creativity

"Two years of research, work and technical adjustments went into the Apollo project. Apollo is a chair with an obvious architecture and a soft treatment. Made to specific technical specifications, but with a soft and smooth appearance, to give it a really friendly feel."

The collection is available in upholstered or mesh backs with different mechanisms and accessories, thus adapting to multiple workstations."

Iratzoki & Lizaso

# Apollo Family

Simple, understated Apollo will blend beautifully with the decor of your work spaces, bringing a friendly touch that instantly adds that important feel-good factor.

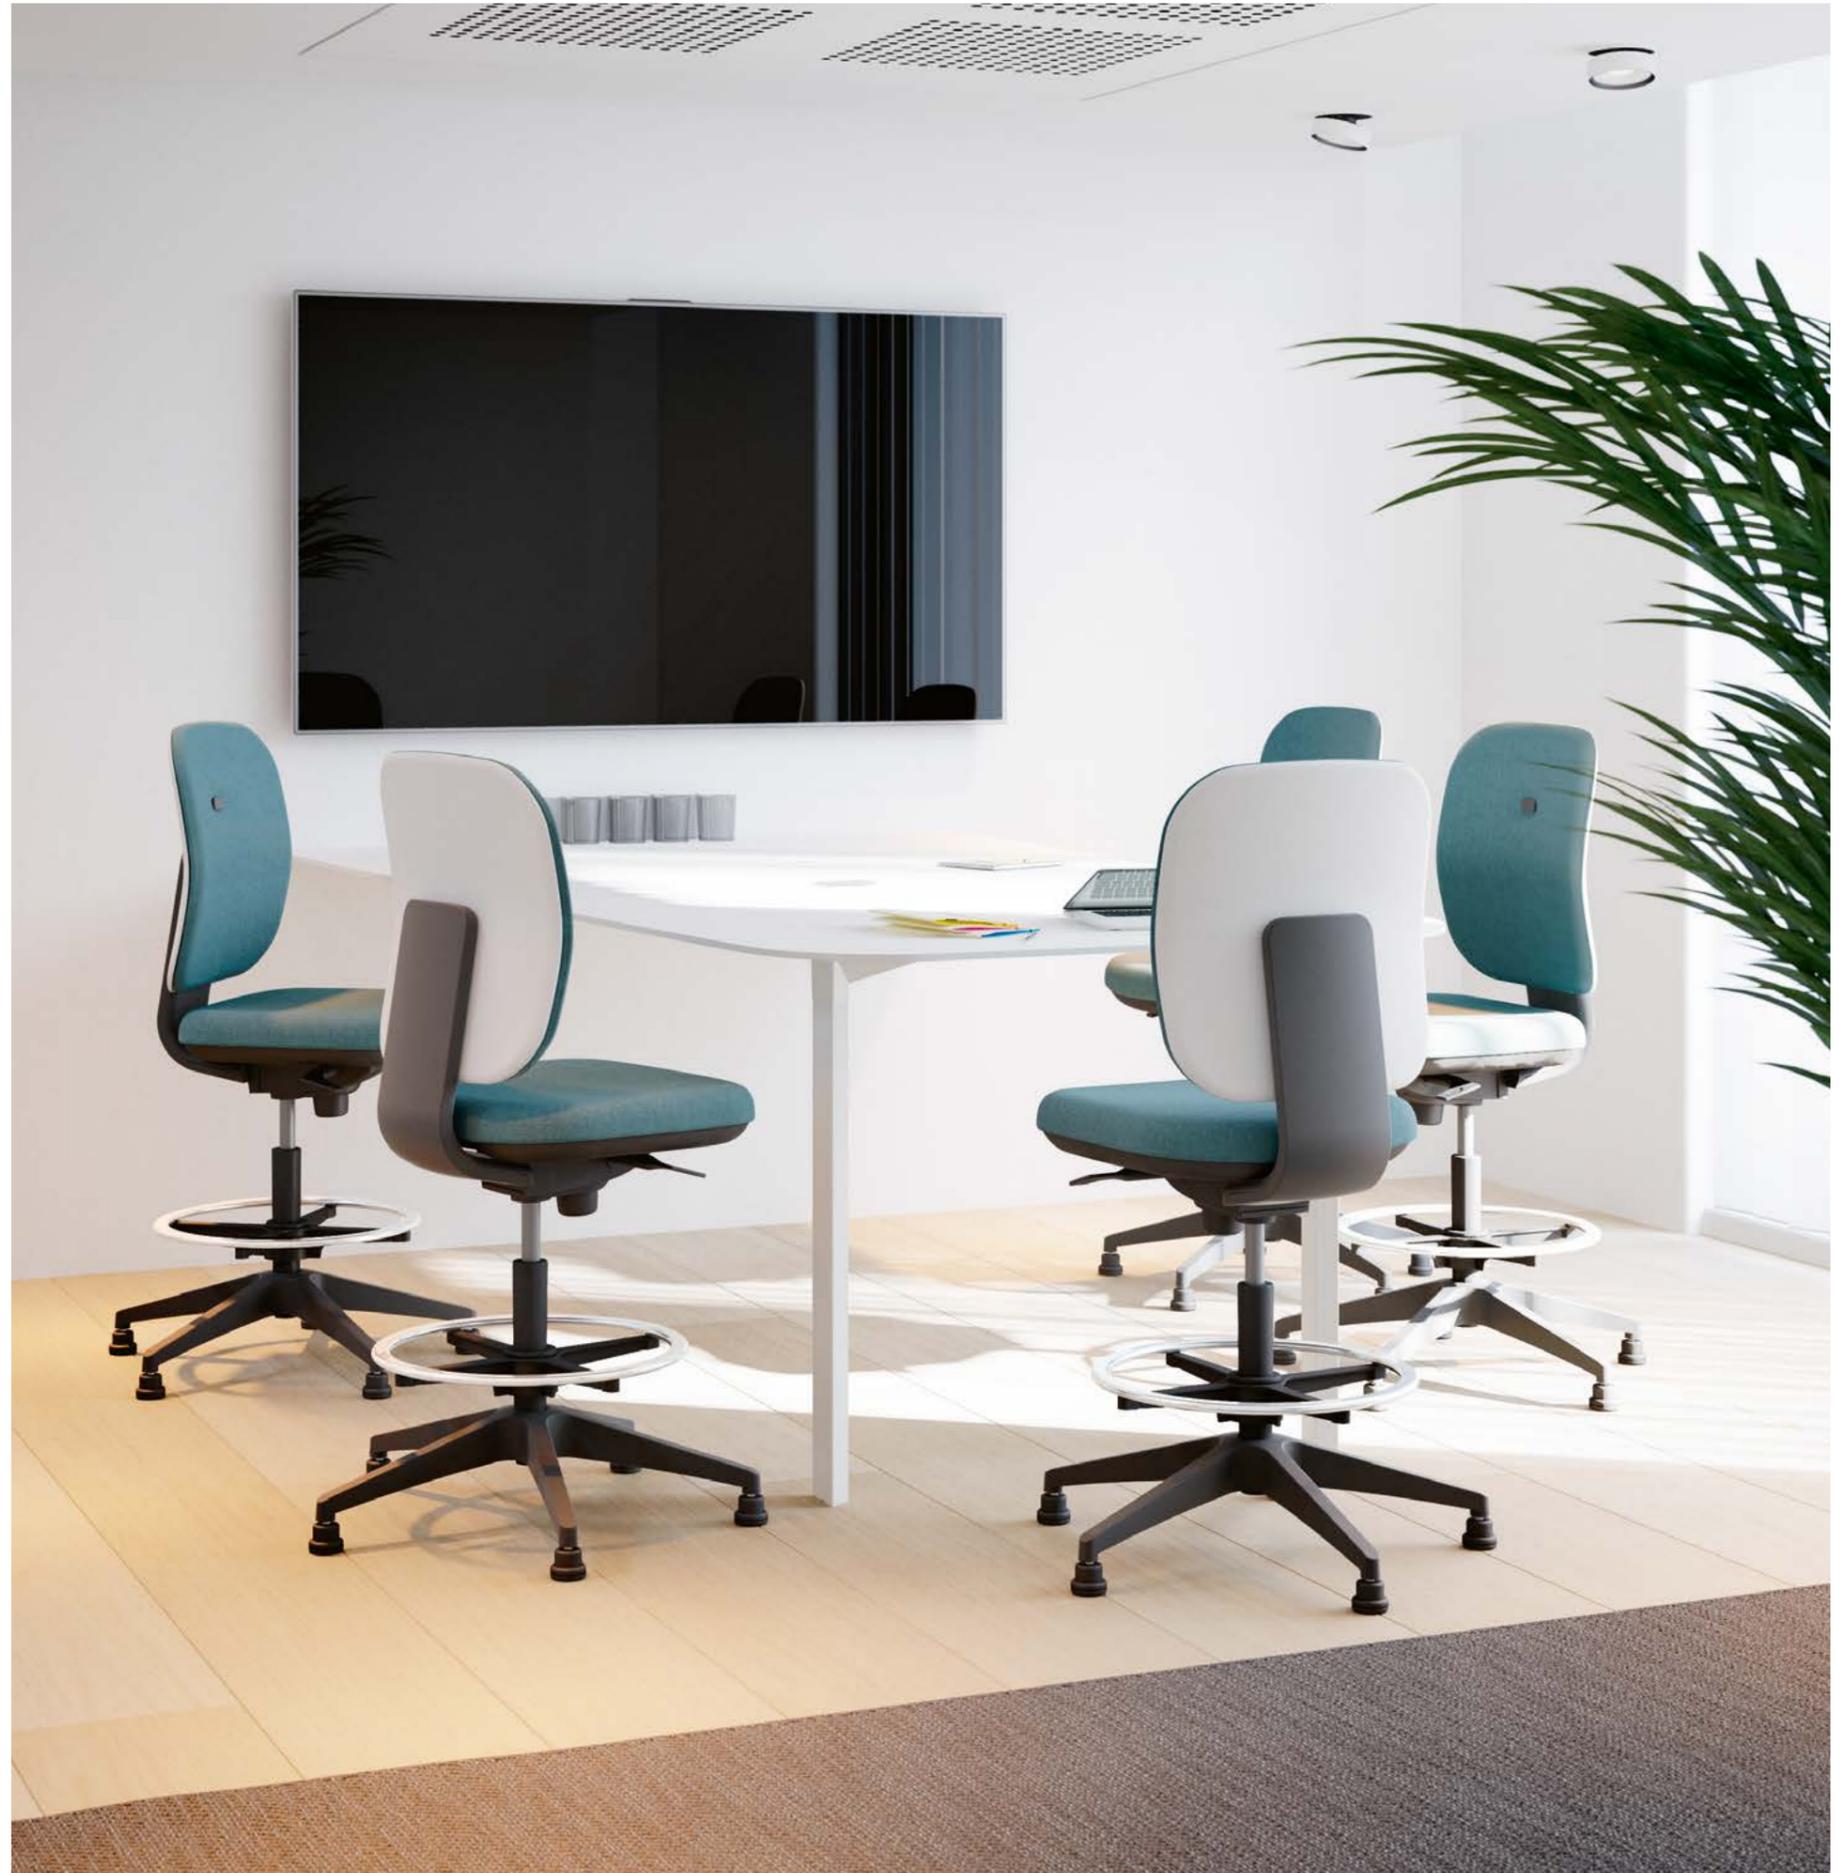

BEAUTIFUL PROPORTIONS,  
SIMPLY DETAILED.

Apollo's seat/back assembly, a perfect fusion of form and function, is a powerful element of the upholstered version of this chair. Generous and curvy, it contrasts with the grey shell, adding softness and character.

# Apollo Collaboration

Apollo high chairs were designed to make it easy to move from sitting to standing, a key feature of the new, collaborative working styles – particularly when in project mode. Comfortable and boasting intuitive controls, these chairs are perfect for work spaces intended to stimulate team creativity and efficiency.

# Apollo Comfort

With a choice of two back sizes, upholstered or mesh, synchro mechanism and two types of armrest, Apollo offers users the kind of personalised comfort that makes it a chair that you can really love.

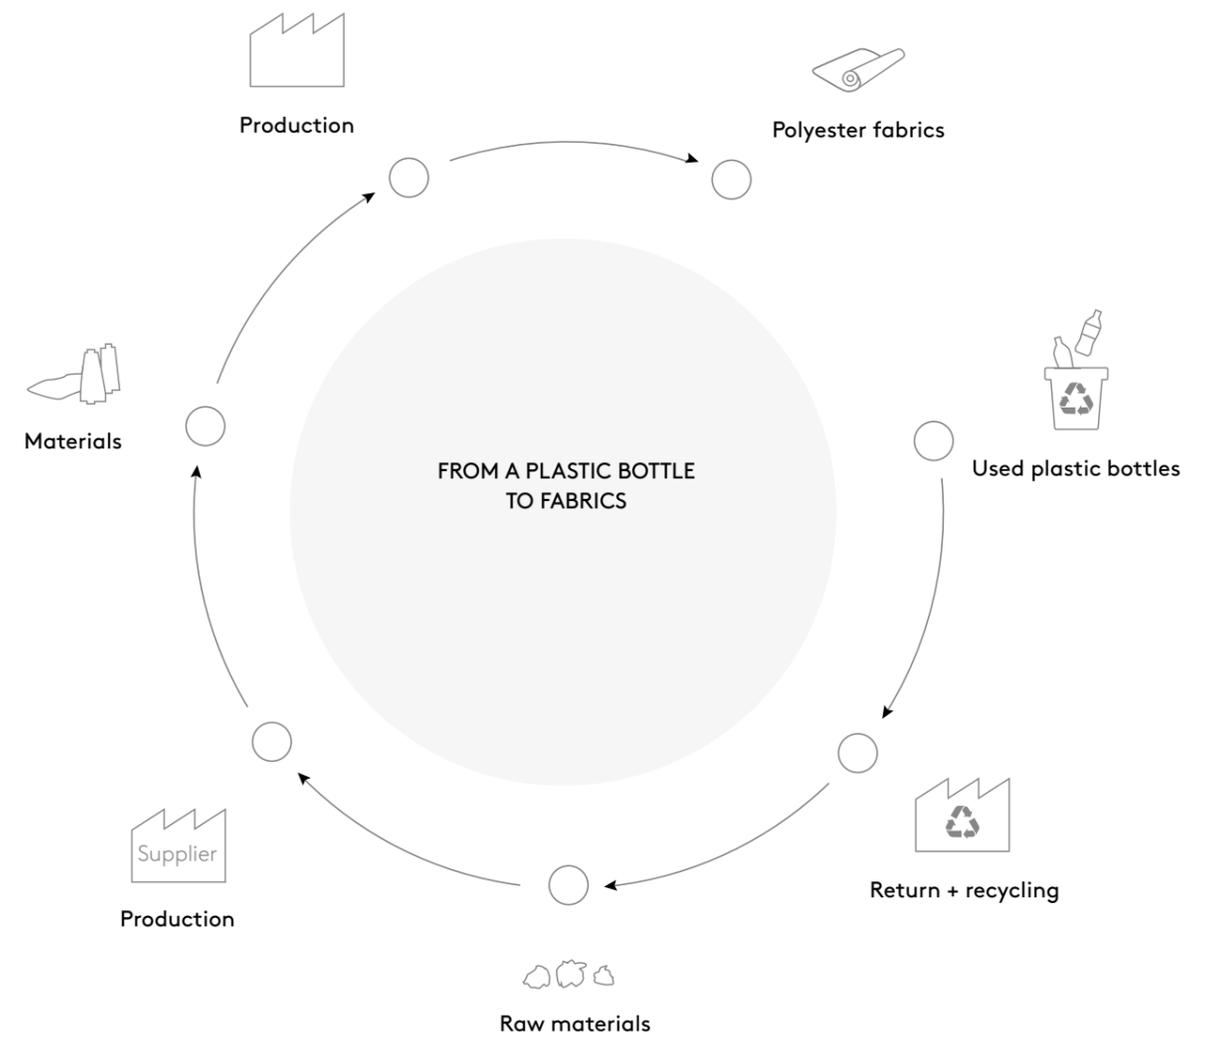

# Apollo Manufacturing

## Light and airy

We used WEB™ mesh by Danish manufacturer GABRIEL for Apollo, as we felt it best suited the chair's style. WEB™ is a sturdy blend of style, comfort and durability, with a see-through effect that gives the design a particularly light and airy feel. The variable thread thickness produces a silky soft, textured finish delivering increased levels of comfort, while the colour palette is all about soft, natural, restful shades.

## Environment

WEB™ mesh boasts the Bronze Cradle to Cradle Certified™ label and meets some of the strictest standards in terms of life cycle durability, environmental protection, health and safety.

## CONFIDENT, COMFORTABLE AND SUPPORTIVE.

The lumbar support on the mesh version of Apollo is what gives it its originality: its organic, honeycombed shape is an integral part of the whole design, and, when combined with the unique qualities offered by mesh, this is a soft, airy, height-adjustable feature that guarantees tailor-made comfort for everyone.

Apollo is a beautiful collection to cover a range of requirements, both functionally and aesthetically... each one being just as important. With multiple options for size, colours and optional features, this delightful collection is suited to a wide variety of office space, and of course people.
