

JENSEN-UP Linking Panel

Installation

Wind-in the threaded studs into the sofa arms, leaving the centre one slightly longer to help with initial linking.

Fix the L support brackets to the lower arm faces.

Rest the panel onto the brackets and slide it onto the studs – one side at a time.

Use a “podger” in the outer bracket hole to pull the panel into position and locate the inner fixing screw, ... locate the outer fixing screw and tighten both in-turn.
