Pop - task / operator seating

Conceived with comfort in mind, Pop offers generous upholstery combined with sophisticated engineering to provide the ultimate in operator seating... at a realistic price point.

A synchronised seat and back movement, which may be set in a free-float mode to allow dynamic support for the user's back, lies at the heart of this chair collection. The back height is easily adjusted from the seated position using Pop's ratchet back height adjustment mechanism, while height adjustable arms complete this robust and versatile seating solution.

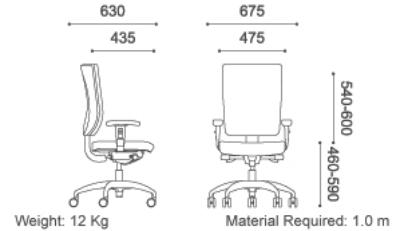

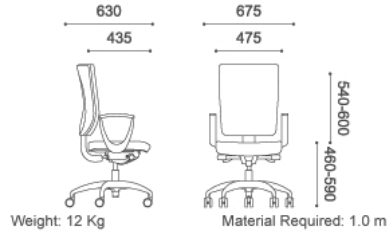

A sophisticated synchronised mechanism is at the heart of the Pop chair, providing the correct dynamic posture support required in today's hectic office environment.

Simple finger-tip adjustments ensure the perfect posture can be achieved from the seated position, while the option of seat depth adjustment and height adjustable arms enable the Pop chair to be 'tailored' to your requirement.

Durability is guaranteed, with the use of a robust mechanism, which has been tested to 'severe' contract use, under BS 5459:1990 part 2: test level 'S'

All chairs are manufactured under the stringent BS EN ISO 9001:2000 Quality Assurance Standards and BS EN ISO 14001:2004 Environmental Management System
